

## Divine Human Blueprint Vision

It's very exciting to realize that you can improve your vision without surgical procedures or vision enhancements such as glasses, contacts or laser surgery. We have discovered how the vision system works and how to restore much of lost vision by several innovative and efficient procedures.

Vision, and how you see the world can make a huge difference on your comprehension and understanding of the world. Improving vision was my first experiment 9 years ago, having worn glasses for reading since age 18 I decided to access my regeneration abilities and strengthen my vision. This was prior to my understanding the divine human blueprint, and regardless of my comprehension I was successful in reversing a vision condition that had been declining for 26 years. I created a strong intention, amplified by meditation and prayer. Over six months my vision improved. I was also struggling with a weakened immune system, I got to thinking growing back my adenoids and tonsils might make a significant difference to my health and vitality, so I intended in meditation to grow them back.

When I went in for my annual vision test, my ophthalmologist declared; 'Your vision has improved, that never happens in your age group, the results from the last exam must have been wrong'. I assured him, no I intended to improve my vision, so he said; "it's not possible". He checked to see who had done the last eye exam. 'Puzzling; I did the exam.'.

So maybe one restoration is a fluke, but at my next medical visit my endocrinologist noticed I had tonsils full grown tonsils. He said 'they must have been there all along' I assured him he had examined me 6 months earlier and there were non. They were surgically removed at age three.

I shifted my health pictures around that time. I realized on some level I wanted the western medicine professionals to acknowledge that miracles are possible. That we have more power than we know. But clearly that was not going to happen. I love that I currently have representatives from the scientific and medical professions training with me. I realized I had to step into my own authority and let go of attempting to 'prove' anything to 'non' believers.

If you begin with the understanding that vision challenges are correctable and that clearing miasms (group though virus) and poor DNA programs many of the vision issues can be permanently corrected.

If your career requires your eyes need to be on a computer screen many hours a day, using an orange disc between you and the screen can protect your vision. With technology, the eyes begin to match machine energy which is grey. When your vision centers, eyeballs, optic nerve and visual cortex go grey vision dramatically reduces.

Macular degeneration, cataracts

## Healing the eyes

- ♦ Test for color of the right and left eyeballs. I estimate 90% of adults are living with a diminished eye color such as grey or black. Clearing the color by pumping gold from the right hand to the eyes will improve many peoples vision right away. Eye's should come up to pink or green.
- ♦ Test if cellular neo genesis is the next step and if yes proceed to page xxx
- ♦ Test for color of the optic nerve and connection from eye ball to visual cortex if a person has the need for glasses or has had laser surgery on the eyes this area will be grey or black. Clear grey and black colors by pumping gold from the right hand towards the optic nerve. We are looking for the optic nerve to go to green.
- ♦ Test if cellular neo genesis is the next step and if yes proceed to page xxx
- ♦ Test for color of the visual cortex. If grey or black, clear the color by pumping gold from the right hand to the visual cortex eyes bringing this part of the brain to green or pink.
- ♦ Test if cellular neo genesis is the next step and if yes proceed to page xxx

Now that we have down a basic tune up it is time to discover why the eyes lost full function and correct these issues. The first natural area we will look to is the programing of the DNA. Everyone knows we get our eye patterns from our family, that's a no brainer, so if family history gives you poor vision or near sightedness less clear that program once and for all and set you on a path of clearing and restoring your sight.

- ♦ DNA obliteration process found on page xxx  
All low function eye programs  
All illnesses in eyes programs  
All old age eye degeneration programs
- ♦ Replace the cleared programs with healthy vibrant eyes through the end of the body
- ♦ Firmly program resets to stay at the new setting
- ♦ Ask the body if clearing a miasm is next
- ♦ if yes pump gold energy into the group mind belief that is affecting the poor vision. Until you have entirely cleared the miasm

- ♦ Test if a spiritual timeline issue is affecting your vision. What this means is you are looking for things that happened prior to you being in your body that are affecting your vision. Spiritual time line clearings are super easy go to page xxx for steps

Sometimes prior to birth a decision is made and the person at birth is unable to connect with their eyes as a spirit. If this happens, vision will be dependent on the physical body (human animal) for vision health and information. To correct this condition

- ♦ Pulse lavender from the left hand into the eyes about 6 minutes. The lavender energy comes from your golden rings, if you have not yet mastered using your golden rings use universal lavender.
- ♦ Test to see if the healing is complete for human spirit connection to eyes. If you test no
- ♦ Spiritual timeline clearing to remove painful episode from previous lives that provide reason to not want to see or see clearly. The spiritual time line clearing is found on page xxx
- ♦ An aging pattern in the eye that diminishes vision is a hardening lense. Soften lenses of the eyes with pink energy again accessed from the golden rings.

Anastasia Chopelas, Phd and our staff physicist presented this question. *“How do I soften my lenses? As the human body matures the lenses become hard and as a result vision is lost”* I love having Anastasia and folks of her caliber in the program, because as a scientist she will know a question that I will not have considered based on my vantage point.

When she presented this question in class at a recent Miraculous Living Apprentice Weekend I tested a pink healing would soften the lenses, so the entire class proceeded to work on their lenses restoring the soft flexibility of youth, and the clarity of vision that comes with it.

I had done all the eye clearings but had not yet gone to 20/20. As a result of the pink lenses healing my vision which had been excellent ever since. I can work on the computer for hours without eye strain, I had started writing this book 12 weeks ago in 14 point with cheater glasses at 1 strength I am now at 12 point letter size wearing no glasses and very comfortable reading and typing away for hours.

A faulty immune system can be the cause of some eye and vision issues. A long time client and now at 78 a student in the Miraculous healing Apprentice program, Roland Ratner has suffered from the insidious illness referred to as macular degeneration.

Robert, once a brilliant Bavarian baker, made treats for the high end clientele of the San Francisco's elite hotels. Robert speaks with a lovely, thick Germanic intonation and is a joy to be around. We have been able to make some headway in his challenges with eyes and during events he experiences greater vision and clarity as well as comfort in his usually sandy feeling eyes.

Although it does not matter when you start your miraculous healing process, there are some additional challenges that come with starting when your numbers identifying your age on the drivers license are over 70. The healings and gifts are for everyone, no one is too old or too sick to receive the healings.

Something I highly recommend is using the daily meditations to hold the new health you are experiencing with the healings. A second recommendation is that you take on personal responsibility for your health, even in you are in collaboration with a more skilled healer. When you say these are my eyes, I need them to work well the rest of my days, that is a very different affirmation then, they are always this way. It is one thing to experience the miracles provided for you by a healer, and an entirely different one to say I claim health for myself and will not stop until every stone is overturned and I am experiencing the vision I know is mine by my divine birth rite.

With Robert's experience of macular degeneration there are family matters in this lifetime that need clearing each time we do an eye healing. Think about what you may not want to see, or hear if hearing is your challenge. I recommend the love and karma clearings for vision issues and illness related to family and relationship pains.

Adrenal fatigue can affect focus and vision. The chemistry of adrenal fatigue causes a problem with dilation. The obvious fix if you test this issue is do a full healing on adrenals and stress. This healing will be supported immensely by the free from fatigue to fabulous meditation program with daily meditations to help reverse the condition. Find this program at [.....com/](http://.....com/)

I occasionally meet people who have auras as thick as pea soup. Fatima a gen-y coaching client of middle eastern descent, working in the medical profession came to me with a number of challenges. The first thing we needed to do was do a big clear out from the inside out. She had many control issues, and was often distrustful of people and her experience. She thought people plotted against her or betrayed her, and was not at peace.

Her emotions were on high alert and I found her extremely challenging to assist as we had to lay new safety ground work for her routinely. The first big leap she got was when in a deep clear out, I removed all the collected debris in her aura, and suddenly she could see much better.

Odessa a Tasmanian immigrant had a similar issue and her vision also took some big leaps up with the clearing.

Is a cloudy aura more common in first generation immigrants? Probably not. More likely a cellular issue, with fear pictures steeped in the DNA and cellular body. Fear like a magnet holds everything you are afraid of close to you.

So you can clear the aura, however by the next week both gen-y gals would be back with their auras muddled up again.

In addition to the DNA, spiritual time line programs may provide more material for the condition however it will most assuredly start in the DNA and cellular body. Energies in aura and in front of eyes

Pacing slowing with this condition, nothing too fast no big leaps. Slow and steady heals the fear pictures and the neurosis that it produces.

### ❖ **Miasms after the healing**

Even with this careful reprogramming, your body will want to make other human bodies right, and will mirror degeneration and eye failure, just by being around people who believe eyes have to get worse. This actual process is a miasm. Basically it is a group virus, a false belief, that when matched makes the experience real. If your vision has been improved and then gets worse, there are 3 cuprits you can redo to restore the improvement

□ Miasm clear the failing eyes group mind virus again by pumping gold into the miasm.

If someone tells you after your eye's have healed, *"well ya know I'm getting old and my eye's aren't as good as they used to be. It's just a fact of life."* Now your body has just heard what most people believe. If your personality is that of a peacemaker or an empathy, you will naturally want to validate and make other's right. When your cells make the other person right, the healing crashes. Good news as quickly as it goes away it can be restored.

How to avoid this? There are some people who are more vulnerable to this circumstance, if you are one of them 'don't make yourself wrong'. Empathetic and peacemaking people are amazing healers because they seek to understand others in a profound way. This is actually an excellent approach as a scientific researcher to gather data. So your entire life has been set to these parameters and now you are ready to make a change.

Do not throw the baby out with the bath water. Just observe where in your being the match for eye's happens, very likely it will be in the first brain the instinctual/survival brain. Cobalt blue directed at the program for matching will

help especially if you imagine it there is the information is coming in. Either way, later or on the spot cobalt blue will deprogram this.

As you progress you may discover you use the matching and empathy less as you are able to be safe and practice love wisdom. With love wisdom it is more important to know who you are and what you are committed to then what others are thinking or feeling. Empathy and peacemaking are younger versions of love wisdom.

❖ **The second reason for degeneration in the eyes after healing is found in the DNA**

- ♦ Were you successful in clearing aging and future eye degeneration and illness from the DNA encoding? If not do that now
- ♦ Have you been around your family and the family DNA bubble reset your DNA to the family degeneration programs? Clear the family DNA bubble, coming towards you of eye illness and reduction of function.

**Illness can affect vision, both eye and body illnesses.**

I am speaking here of things like pink eye, allergies in the eye even a virus like the herpes virus. Once you have cleared the illness you may need to do the eye protocols over in its entirety.

Follow the basic Miraculous Living Protocols to clear illness in the eyes, as each illness will present unique circumstances, and you will want to address the need of it the body exactly as they are being presented to you for the most complete healing.

Having people not need their glasses after a Miraculous Eye Healing is a common occurrence. Expect a good result the first time. This may represent an inconvenience, if you have to wean off glasses, as you eyes get stronger. Christine Wilson age 76 and a pediatric nurse in the Miraculous Living Apprentice program had just purchased a new pair of glasses prior to attending an Apprentice weekend. We covered the eye protocols in the weekend and she was left with much improved vision and useless glasses. I am sure if you are wearing glasses you would not mind having this issue. It's a good problem to have.

There is a Bengali song I learned from Ali Akbar Khan that sums up the privilege of living on earth with eyes to see.

Suddhi Bisa Ragahi Bisa Ragahi ajah  
(write out the words and proper translation here)

My God when I look around and see all that you have given me, I am over whelmed, My heart is overflowing and my eyes are filled with tears.

(This and 5 other amazing compositions are recorded on my Music CD Gratitude)
