

### **Vision\_See Clearly\_Part 3**

Hi and welcome to Vision: See Clearly, your bonus class. I just want to welcome everyone to the call. Today, we are going to go through illnesses. Last week, we did the regeneration for the eyes, the optic nerve, and the visual cortex. You are all growing new eyeballs, new optic nerve and the new visual cortex.

We are getting ready now to take a look at how to clear illness from the eyes. If you have been confused up until now, understand that class 1 was clearings, and that's exactly what we did. We did clearings and then you had homework to work on more clearings if you wanted to. Class 2 was regeneration. We started regeneration in the eyes for everyone. Class 3 which is the bonus class, we'll be discussing how to deal with eye illnesses and anomalies in the eyes.

Welcome to everyone who's signing in. We have over 200 students in this class. It's a great class. I've got messages from people; they're seeing better, they're feeling better. There's more clarity, floaters are gone. So, we are getting some really phenomenal results in our early stages which is fantastic. And understanding that I've given you dates, 90 days, 130 days, different parts of the body, rather different parts of the vision center will take different amount of time to regenerate, but you should be starting to actually see some improvements.

Okay and I see lots of names signing in. Welcome everyone. Welcome everyone. I'm always thrilled to see all of your names. So many of them, as I go through, I remember you from classes that you've been taking and so it's really fun to keep seeing you. From Stonehenge, oh Claudia, I've been to Stonehenge a few times.

What we're going to do is do a quick review of muscle testing and the quantum pump. You guys should have this by now because you've done the homework and you've gotten this three classes in a row. The quantum pump is the hand movement. You're pumping your hand. Your elbow is at your side. Your elbow is down there at the side and you're pumping. That's the quantum pump. So just the hand in out, in out. This is the right hand. It's very simple, the quantum pump. The double pump is two hands. I do it alternating. You can do it like this or you can do it alternating, which is what I've done. Someone asked if your hand was open, well yeah, I'd say your hand is open. I wouldn't say that it's closed. It doesn't look closed, does it? And then you can also pump with your feet. That is just a paddle with your ankle. That's the quantum pump/ The reason the quantum pump works is because with our mind, we're connecting with the quantum field and we're rearranging the way the particles are vibrating. We're rearranging them to a better situation.

So you've already started your regeneration on your eyeballs, your optic nerve and your visual cortex. We did that last week, so we're not going to be doing anything else on that. Today, we're going to be looking at eye illnesses and some of the processes that you can do to help heal illness and anomaly in your vision center.

And then, muscle testing is the right hand, the fourth finger, the ring finger pressing down with the pointer finger of the left hand. If you press down, it holds. So you're holding it really firm and then you're saying something that is true or not true. You're saying 'my name is Julie Renee' and for me, that would be true. For you, it would not be true. So for me, it's true and it holds stiff. It holds firm and it doesn't move. If I say 'my name is Bozo the Clown' it drops. It drops. If you like to watch a little demo video on YouTube, you could just put Julie Renee Kinesiology and you'll see a little demo video on muscle testing. I talk for maybe a couple minutes. If you would like to just watch that through a few times, you're welcome to do that. But we do that in every class, so you should have that by now.

Okay, very good. From here, we're going to start looking at the chart I prepared. And let's go to the top here. So, how many of you have floaters, that one of the things that you'd really like to work on is getting a handle on having the floaters, the little weird spots in your eyes? With floaters, you're going to be pumping, depending on the severity and how many you have, anywhere from 1 to 17 hours of pumping. We've given you all the charts – the amplification chart, perception and spiritual parasite charts. So you would refer to all of the charts and you would pump to clear from each of the charts. And then I went through each of you and I looked at where were some of the trouble areas in each of these and with floaters, it was Lucifer stops, Atheist thought forms, DNA, alien type 6, seeds, emotions and karma. But if you did the charts, you will get all of them. These were just the ones that I think are really troublesome with floaters. And then this column is best advice on clearing. Floaters sometimes take up to about 7 weeks to completely disappear. While waiting for them to go away, pump every day, or rather every third day and imagine them leaving. You can do the quantum pump or quantum chopping. That would be how you would work with this chart.

Now the second is near and far-sighted. And for those of you who are talking about macular degeneration, we do have that included Look at all of them that I've included here. Macular degeneration, it's on the third page, but we do have that included and so there are things to be looking for and to be clearing. So we're going to just go through step by step. This is a bonus class so it's over and above what we have scheduled for you, but I think this is going to be really wonderful and helpful to address some of these additional issues.

Near and far-sightedness, depending on the severity, 7 to 80 hours of pumping. You could use amplification, perception, spiritual parasite charts. This is going to be the same all the way down. However, here we go, near and far-sightedness, you want to look into clearing specifically bloodline, DNA, Lucifer stops, agreements, emotions, alien type 4 and 8. So there are a bunch of stuff. Holographic inserts, portals, mechanisms, implants, nano-technology. There are a bunch of stuff that affects near and far-sightedness.

Clearing is the first step and that, we did in week one. We went through all kinds of clearing. But now, specifically if you're clearing either near or far-sightedness, you're going to be clearing by following the charts. And then 131 days for the regeneration which we all started last week, so you're 7 days into the regeneration. And then you might want to be doing a second regeneration. So once you've cleared it, regeneration really generally solves near and far-sightedness. That generally is the solution. You're welcome. Okay, so that would be addressing near and far-sightedness.

I want to take a moment to say hello to people who have signed in and sent messages and we'll keep looking at the charts. Lots and lots of you signed in. I know I got right started because I want you to stop pumping for these, if you have floaters or near or far-sightedness. The next one we'll be doing is astigmatism and size and shape issues of the eyeball.

Rosie was the first, and Lydia, and Margi, Roxanne, Lydia from Minnesota. Yay, I was back in Minnesota in the fall. Nancy, Trevor. Hi, Trevor. Jean, Doreen. And Jean, the droopy eye, we did regeneration last week on the tissue and muscles so you've got to give it a little bit of time. Oh! "Droopy left eye is no longer droopy." Oh my goodness, that is fantastic! That is part of what we did last week when we did the regeneration. I love hearing that. Oh my God Jean, fantastic. Doreen, and Suzanne, and Stephanie, and Brenda, and Sharon, and Margot, and Anne, and Violet, love to you. And Gary, and Alexandra, and Sandy, Donald. Hi, Donald. And Nila, Rosemary, Marilyn, Muscan, Servina, and Mary, and Barbara, Carolyn, Dawn, Felicity, Yvette, Karen, George, Claudia, Myrna. Myrna says I'm getting younger. Thank you. I'm definitely feeling good. Last week, I was not feeling good, but I'm feeling great today. Diane, that's Diana rather, and Marcia, and Brenda, Lenka, Julie, Audrey, Denise, Janice, Donna, Joy, Elena. "Love and 100% divine perfect health for everyone." Yes!

Don, "Nearly blind from optic nerve atrophy." That should be regenerating, so let's see how that works. Blurred vision in left eye. Near-sighted for Marilyn. Mary, "I'm having cataract surgery but I want to make sure to come out of it with perfect vision, with no need for any correction." Beautiful. That's great and I think this would really help you.

Lori, "I hope you're feeling better." I definitely am feeling better. Lindi, "Hi to everyone!" And Margaret, and April, and Robin, Sherry, Diana. "We're pumping to clear specific eye disease over and above what we've already cleared." Exactly, Diana. Many of you had specifically asked for issues, so I mapped out what I saw were the nature problems with the different eye illnesses and anomalies and so that's why through this extra class, we've already done a big clearing, we've already done a regeneration, so this is just over and above.

Dixie, "I have glaucoma. Suspect, reducing pressure in the eyeball. Thank you." Lydia, "I have been working to clear the near-sightedness that is on-going for many years. My vision is definitely getting sharper but I'm noticing that I wake in the morning with blurry vision." That would have to do with drinking enough water. You might take some sips of water during the night, because your eyes are getting dehydrated while you're sleeping. And then Cee from Colorado, "I'm wondering where the charts are." Those are on the delivery pages. When you go click on to review the class, you'll find under the video, you'll have the transcriptions and the audio and the charts and also the slides. Dia, "Appreciating your bonus class and everyone participating in the class." Helena from the Netherlands, With love and great gratitude. "Healing near and far-sightedness and very large, lots of tiny floaters popped up just two days before the class. Most are already gone." Fantastic, Sharon. I'm really happy to hear that.

Okay, so we're going to just take a look at some of these others. Today, we're just looking at this chart of anomalies. If you want to ask a question, this is the time to do that. You can see that I've included many, many of the things that you guys have talked about. Astigmatism has shape and size. Lucifer stops, bloodline, DNA, evil spirit curses, satanic curses, trauma, emotions, alien types 2 and 6, and today's permeations and mechanisms. Sometimes it takes four regenerations with astigmatism. Each are about 72 days. And while you're waiting for the shift, pump every three days for 30 minutes, focused on the shift you intend to make. With astigmatism, this is one of the things that I would recommend for you. Quantum pump and quantum chopping are the best hand techniques when you're really working very specifically at seeing yourself hear this issue.

Glaucoma depending on the severity, 70 to 170 hours of pumping. You're going to use amplification, perception and spiritual parasite charts. Evil spirit curses, trauma, emotions, DNA, permeations, aliens type 5 and 8, mechanisms, seeds, and implants. And then clearing glaucoma is clearing an illness like a virus for example and requires multiple clearings. 6 to 14 clearings. 50 minutes each is very helpful. It's a process and just like clearing an infection is a process, clearing glaucoma which is an illness takes

some time and is very doable. You want to be using the quantum pump and quantum chopping are the two best hand techniques for glaucoma.

Okay and then let's go down to the next page. There we go. We're not going to talk about aliens. It is on your chart, but this is not a class for spiritual parasites. It's just I'm giving you what type if related to an eye illness. So this is not a class that I'm going to teach on spiritual parasites, however I am including the chart on spiritual parasites so if you want to read a little bit about them, you are very welcome to.

"The retina is too thin from near-sightedness. Am I safe to do the surgery?" Yes. 100%, you're safe. Barbara, "I do not want cataract surgery." Yes, so I'm giving you choices. You guys can do surgeries or you can work on yourselves. I just want you to know that you have choices here. And Helena from the Netherlands and Sharon. Barbara, "Cataract surgery, I hope this would clear the fog." I hope that for you too, Barbara. You have your directions on what to do for the cataracts. Actually, it's coming up. That's the next one that we're going to be looking at. Laura is asking about the quantum slide and you're welcome for the bonus class. Yeah, I will do the quantum slide because it actually is included in quite a few of the healing processes for illnesses. Why don't I do that right now?

The quantum slide is this hand movement that goes across like that. That's how we're doing it. You're doing that. It's going across your chest, like that. Your hand is wiggling, kind of like a wave and the wave is going across the chest like that. That's the slide, the quantum slide. A wave in a parade would be more like this, but it's done more like this and it's sliding right across the chest. That is the quantum slide. Again, the hand is going like that and it's going across the body. The quantum slide, it's kind of sliding across. Sliding, graceful and easy and your elbow stays at your waist.

Okay, let's see, there are some more good questions here. And Ann, alien types, I'm not going to go through those. Marilyn, "I reviewed the charts several times but couldn't find agreement on near-sighted." If you don't find it on the chart, then don't worry about it. But agreements are in perception chart, if you're wondering where the agreements are, or they're in emotions sometimes. "What do we do to build on inside of the eyes? Would that be pumping for hype tissue or something else?" I don't know what that question is Cee. I don't understand it. But regeneration is one thing and then clearing is another. If you're clearing something like a virus, anything that would be a build-up on the eyes, you could do the quantum chop, the chopping. "Can you check for macula is getting better?" For Rosemary, the answer is 100% yes and Rosemary, it looks like it's already about 60% improved. And that's what I was saying to you guys is we're just starting the regeneration so you want to be a little patient, but if you're seeing some

evidence that things are getting better, that's a good sign and we're at the beginning of the regeneration.

"The chart calls for a doorknob. Will quantum chopping clear it?" The quantum pump will do everything. The doorknob just looks like you're holding on to a doorknob and you're just doing this. It's just the elbow at the waist and doorknob. It's just going around. The quantum pump will clear everything, so if you don't know a hand technique, don't worry about it. Just do the quantum pump, the quantum pump will do everything. The doorknob is a little more aggressive. It's a little more grr! It looks like that. My hand is like it's holding on to a doorknob and then it's just spinning, the quantum doorknob. Very good!

I can see you guys have really been looking at the charts. I'm really happy to see this. Okay, let's go to cataracts. Let's get through a few more of these and then we'll come back for questions again. Depending on the severity of the cataracts, 13 to 193 hours of pumping. Use the charts. Special attention to holographic inserts, seeds, alien type 6, soul contracts satanic curses, miasms, trauma and DNA. And then, best advice on clearing cataracts is to pump 30 minutes daily and imagine them completely gone and seeing clearly. Using the quantum chopping and the quantum pump are the two hand techniques that are the best when you're going through this process of clearing with cataracts. And then I put one here just for pressure because some people, it's not related to glaucoma or whatever they have, like pressure issues with their eyes/ And depending on the severity of the pressure issue, 60 to 107 hours of pumping. Use the charts. I saw that satanic curses, soul contracts, miasms, trauma, Lucifer stops, DNA, bloodline – all seem to be troublemakers when it came to pressure.

With pressure, you want to be imagining resetting a pressure gauge to 100%. Sorry, it shouldn't be 20%. It's 100%, 20 days in a row. That's what that is. And then, it's the quantum slide, side slide is the one that really, really helps with pressure but also the quantum pump. So if you forget how to do the slide, then go ahead and just go do the quantum pump.

And then vein issues, and depending on the severity, anywhere from 5 to 58 hours of pumping. DNA, emotions, alien type 7, implants and permeations. You want to relax and see the vein going to the natural order. See peace with your eyeballs. And so part of vein issues can be related to pressure, could be related to blood pressure, could be related to stress. Also when I think about vein issues, it has to do with the fire in our body. Sometimes, the fire is often the body. Quantum pump and then also meditation is really good for returning veins to normal. And so you want to imagine your veins is going back to normal and seeing your eyes in meditation just really responding

beautifully to the process. You can pump while you're imagining that too, so that's another thing that you can do.

Visual cortex problems... Oh, let's see, sorry. We went from veins, let's go to nerve issues. Depending on the severity of the nerve issues, 7 to 60 hours of pumping. And you want to do bloodline, DNA toxicity, evil spirit curses and emotions. That tends to be in nerve issues. Nerve and vein issues to me I think are related. Again, you want to relax and align with truth, The nerve issues seem to be our fire burning out and the quantum pump for nerve issues is really helpful and that would even include your optic nerve. Sometime people's optic nerves starts burning out and you want to just restore that. You want to align with truth and have that peace come back into the nerve.

Okay, we'll go into a few questions and then we'll do some more of the challenges. Let's see here, I'll just go down a little bit. Okay, so I did Diana, the doorknob. Trevor, "Right eye, I have a blind patch caused by glaucoma above the center field vision. Can fade this away? Thanks." Yes and that's all about the regeneration Trevor, so you want to work on the regeneration and trust that it's happening. Dawn, "How long will I need to pump for my optic nerve atrophy?" Maybe like 300 hours. And Anne, "For each of the things we're clearing, say astigmatism and near-sighted, can they be pumped together or do we have to pump independently for each one?" You might notice that when you clear one, the number of hours goes down. So it's possible that you're clearing something that has the same patterns or same programs in more than one field, but you do want to just double test and make sure that you've gotten everything. I would pump for one and then I would test and see how many hours I have for the next one. That's what I would do. Because it's possible that you're catching stuff as you're pumping, if it's the same program that's causing near-sightedness and glaucoma or something, it's possible. So you just want to muscle test when you're finished with that and then go to the next one, and it might be a lot less hours. That was Anne and then Stephanie, "I prefer to work on cataracts." Which you can. And Joy, "Can you use either hand?" You can use either hand, yes. "I'm left handed and my right is less coordinated." Whatever hand your hand you like. "Macula wet or dry, do not want to continue having the shots every six weeks." That's Brenda. And Brenda, the regeneration really helps so much, so I would work on the regeneration and then the next round of regeneration.

"Should I pump on near-sightedness first and astigmatism separately or just imagine my eyes totally healthy and 20/20? Could you answer? Thanks so much." Since I've mapped out what you need to pump for, why don't you just pump for what we've got you mapped out to do. I think that would be good. Pumping for 20/20 is good too. "Can past life karma affect eyesight?" It definitely can. "So we link in with the chart or just set an intention to heal and regenerate?" Sharon, we've already done the regeneration so

once the regeneration is complete, you might want to do the regeneration again. But we've already done the regenerations, so it's going to be a few months before you need to do a regeneration again. The reason I give you the charts is so that you can learn what you're clearing and be aware of it. So I would prefer that you use the charts but if you just want to pump, you could pump. It will be less effective if you just pump, but it will be effective. That is why I like to teach you all the details of things so that you understand what you're doing and it's better to know what you're doing. So if you want to come into the apprentice level classes and really take this on, you want to read the charts and really understand it. You want to really learn muscle testing. This is going to be producing the very highest best results. It would be like... I don't know... Can I jump in the water and swim and can I swim in the Olympics. If you're just wanting to swim, you can do the dog paddle. And if you want to swim in the Olympics, you're going to do a lot of practicing and you're going to learn everything about breathing and about body posture and where you're putting your hands and your feet and the muscle development and all of that. So if you just want to dog paddle, you can go out and dog paddle and you'll get somewhere. If you want to swim in the Olympics, you probably need to take this on and learn it a little more deeply and just take it more seriously. But either one will produce a good result, but the more that you're aware of what you're doing, I believe that the better result you get.

Let's go back to more of the chart. From here, we went to visual cortex problems and we already did regeneration on that and depending on the severity, 70 to 370 hours of pumping. And then the specific things you'll be looking for – bloodline, Lucifer stops, black magic, satanic curses, trauma, emotions and DNA. And then cellular neogenesis is the answer to visual cortex problems. That, we've done next last week and the quantum pump is the best hand technique for improving visual cortex problems.

I see that there was a question about... Let's see. "Can we clear edema behind the retina?" I don't see why not. I would do just the quantum pump with the focus of the edema disappearing. Thank you Cee for the pastel compliment. Thank you. Dawn, "Past life karma affect eyesight..." I answered that. "Am I healing my optic nerve?" That's Alexandra. That's 70% true. Stephanie, "I dreamed last night my vision was suddenly clearer, focused and normal." That's a wonderful dream. Sandy, "Can you check if my glaucoma has improved?" Yes, it's 60% true, so it has improved. And Karen, "If we wear glasses and we see that our vision is changing, do we keep wearing the glasses or how do we transition? Thank you." You know my student Bill just went back to older glasses that he had worn 9 years before. His vision improved 9 years. So your vision will improve for about 3 to 4 months, so you would probably want to wait to actually get new glasses until you've gone through four months and then you might do the regeneration again. Yes, so I wouldn't wear glasses that are going to strain your

eyes because your eyes are improving, so I would go back to older glasses. "Vitreous detachment due to a blow on the head." That's Nila. I don't know. It looks like a lot of pumping. It looks like 500 hours, Nila.

And Rosemary, "Are eye issues related to liver or gallbladder issues?" They can be, Rosemary. That could be a possibility. Janice, "To heal macular wet degeneration, could we visualize the blood going back out of the retina like reverse engineering?" You could Janice. That might be interesting to try. "I'm far and near-sighted. How should I pump for each?" Just the same. You're just going to do the same thing for both. Gary, "How many hours of pumping for visual cortex injury from a stroke? Left peripheral field largely blacked out." Gary for that one, the bet is the full brain regeneration which we are by the way doing. Brilliant Brain I believe is coming up in May or June, so you might want to get in where we do the whole brain regeneration. But if you wanted to take this on as a special project, work on it for about 600 hours. Cee you could, yes. And Dia, "How long will it take to improve my vision to avoid the surgery before I lose my job or become dependent?" That's an interesting question. Are you in danger of losing your job because of your vision? I guess you are. Okay, Dia, it looks like a process with you. It looks like it takes time. Like I see you slowly over 4 or 5 years improving, so I would take to heart everything that we've gone through and really work it in every way you can.

"Are we going to get the charts you were showing now?" You are of course getting the charts, definitely. And then, "If someone came for a private session with you to heal an eye issue. What do you do that makes the healing more quickly than us doing it ourselves?" Well, I am 130 times faster than you guys are with anything, but the brain regeneration really helps. Pelinka, "I only found the first page of these chart which was homework clearings." That's true because I just finished writing these charts up today, Pelinka. I wasn't ever intending to give these to you until the last day, so you're getting them today and I've been working on them for you. Carolyn, "I don't seem to have any of these pages." Okay, alright, stop with the nonsense about pages. You're going to be getting this chart today because I made it for you for today's class. So no more comments about pages.

"Will I restore fluid levels in the eyeball? Thank you." Will this restore? It could. Yes, it definitely could. "52 year old had 20/20 vision up until 3 years ago and near and far-sighted. Can you tell if there's a particular reason?" What I really want to know Doreen, rather than is there a reason is has it improved? Because what we did is we cleared all of those issue with class 1 and then we did regeneration with class 2. So I'm more curious, did you get some improvement? "How many hours do we need to do the regeneration?" Muscan, this is what I've suggested to you guys is to wait the 130 days,

whatever it was the regeneration before you think about regenerating again and then you can pump for a few hours. You can muscle test and see how long to get the regeneration going on. But we did the whole regeneration so you could review class 2. We did the whole regeneration of the eyes, the optic nerve, the visual cortex and tissue and muscles. We did a big regeneration. We got it done in an hour. So if you went through the review video, you could get it done in an hour. If you were doing it on your own, it might take longer.

Marcia, you have to really say something because you can't just ask me to be a clairvoyant reader. Can I tell you something to specifically work on? I don't know. I mean, what is your issue? You have to at least ask a question, whether it's should I work on my lenses or should I work on my optic nerve or something. Just ask me some question that's related to something. Pia, "My eyes really like your..." Okay, so I saw that. For the healing scar tissue, Laura, pink. "I can see good with my contacts and glasses also." Yes and I responded to that. Anita, "Once this is over, how do we access the recordings again?" That would be just... Okay. Alright, every week, you get the replay and I don't know if you've opened the replay up but here's the replay and you go into the delivery page and the delivery page will have all 3 classes Each class, I give you charts, I give you slides and that's all include with the audio and the video, the transcripts are added about 7 days after the class, so there are transcripts in there, and that's all in one place. So once you've had the link to that page, you could bookmark that page, which means just on the top of your computer, there's a place for bookmarks and click on the bookmark and you can bookmark that page and you can come back to it indefinitely. And with each class, the slides, the charts, the homework – everything is all together on a delivery page. So you would have had to have at least opened up that after the class. A couple ours after the class, we send you the replay. Did you miss it, do you want to see it, and that's where everything is. All the charts are there, the slides are there, the homework is there. Everything is all together in one wonderful place for you. So you can save it, you can go back and revisit it, you can see it over and over again. And the thing is, if you take any class with me, it's the same thing. Every single class you take, we have a delivery page, we have the charts, we have the homework, so everything is all there. I hope that that once and for all kind of just clears it up. You have it in your mind; it's on the delivery page, she sends it to me an hour or so after the class, just click through to that link and I can save it forever and I'll have this class for the rest of my life. Good? Everybody got it?

Okay, very good. Hopefully, we don't have any more questions about that. Hopefully you all understand that it is here for you. If for some reason you didn't understand what I just said to you, you could contact [support@juliereenee.com](mailto:support@juliereenee.com) and they will just walk you

through it and they'll get it to you, but you are already getting everything right after the class. We're already giving it to you.

You're welcome. I think the one thing that I've felt really strongly about with my teaching is a lot of teachers sell the replays and so you'd have to pay more to get the replays or to be able to have the homework or whatever, that would be an upgrade and you'd have to pay for it. I feel very strongly that you've paid for the class and that you should have it forever. You should be able to access it forever. And so what we've done is we've set it up so that there's a delivery page for every class and that you could have it forever and you never have to... I mean if you wanted to come in to another live class of Vision, then you'd come in as a returning student, so it would be a much discounted price., but they are there for you forever. Thank you. I just feel like I want you to have this information and I want you to really get it. And if you're feeling like, well I'm not sure if I'm getting it, the thing is I'm offering a lot of training and some of the training is really apprentice level where you're learning about spiritual parasites or you're learning more about what is it that we're clearing and where does it come from and all of that. We really spend a lot of time talking about that. And then, in a class like Vision where we were just going to do it in a couple hours, it's really meant to give you a tune-up for your vision. But it's not meant to have you walk away with a Master Quantum Activator Certification, right? That would be in the immersion program or it would be in the advanced apprentice program. So I want to get you really well started because everybody can do this.

And then I was telling you, well you could jump in the water and you could dog paddle which is just pumping, I'm just going to pump, and you're going to get a result. You're going to be swimming. And then if you come in to deeper levels or you're looking at I want to understand this on a deeper level, then you're going to get better results. You might get Olympic athlete results. You might actually win the Olympics and that might be just what you want, or you might want to just dog paddle and have some fun. Both of them are good. There's nothing wrong with just dog paddling and having fun pumping and there's everything wonderful also about really getting great skill. Okay, yay!

Visual cortex problems, depending on the severity, 70 to 170 hours. Oh, we went through this one. Detached retina, using the charts, and then what I saw with detached retina, it looked like bloodline was the number one problem which is clan energy. Memes and miasms seem to be very much affecting detachment of retina. Satanic curses, DNA, emotions, demons and permeations. Isn't that interesting about detachment? So you want to clear demons and permeations. And then, imagine the retina has found its place at home in your eye again. Breathe in ease and serenity as

you see the retina becoming reattached. And then the quantum slide and the quantum pump are the two best choices for working with detached retina.

And then we're going to go to macular degeneration. You would do bloodline, miasms, DNA, black magic. Black magic is things you say about yourself against yourself. That's one of the things you want to be really careful about. Demonic curses, permeations, holographic inserts and emotions seem all to cause trouble with macular degeneration. Having the right to maintain youthful vibrancy and letting go of grief are really important for the full restoration of macular degeneration. The quantum side slide and the quantum pump are the best for macular degeneration.

I will be sending this chart to my tech team and they'll put it on the delivery page. You'll have it within a couple of hours of the class. You'll be getting it today. You'll be getting it in the next couple of hours. I think our gal Marlene who does the send out, she's in an airplane right now so when she gets off, she'll send it out to you.

Okay, very good. I'm going to take a few more questions. Here's the thing I want you to know. I wore glasses from age 18 to 46 and I haven't worn glasses since. Every once in a while, my vision will get a little blurry. I had to take some meds last week because I was sick and I thought I did a lot of pumping and I also used Western medicine and that seemed to affect my vision. So I spent about 20 minutes just clearing my vision and getting back to clear focus for myself which would mean it would be toxicity, because medications are toxic and so it would start telling my body to go back to an older view or an older vision pattern. So I got rid of it and I'm back to seeing really clearly now. I'm clear and focused. I think part of it with vision is being really stubborn about it and saying I refuse to wear glasses, I see 20/20, everywhere my eyes look, I love what I see, I'm very blessed, I feel like God is showering me with gifts. I think some of that surrendering to oh this is the way it is, I think part of that is almost like Atheist energy. Like your body can't hold on to its youthful vitality. I just want to encourage you that you can. You can hold on to your youthful vitality. You can hold on to your vision.

When we look at some of the stuff that was showing up in the charts, group mind and group mind virus which are memes and miasms kept coming up over and over again. So that whole group thought about... You know what my doctor told me when my eyes started improving, he said, "That's not possible. The doctor must have made a mistake..." And then he saw it was him, he was the doctor. He was like, this is impossible. And so the group mind and western medicine will say that it's impossible for you to go back to 20/20 vision if you've worn glasses for 30 years, but I'm here to say that you can and that you have to get stubborn about it and say I own this. I'm doing this for myself.

I don't discourage people from doing cataract surgery or whatever, but just understand that if you're correcting your vision with laser surgery, that's your correction. You don't go back completely to the 20/20 natural vision because you have the scarring that they do around the lenses to make your 20/20 vision. So I want you to make the best choice for you and I want you to know that vision is everything to do with you believing that you are youthful and vibrant and that you want to see the world in front of you. You want to look forward to what's coming up next.

And when I see macular degeneration and cataracts and glaucoma, I have concerns about the emotional state of people, so you want to look at what are my emotions and do I really love my life? Am I cherishing the life in front of me? Am I excited about what's coming up? So really take a look at what's going on with you emotionally too and why do you need to see clearly? What's so important to you about seeing clearly. I want you to really be thinking about... I don't know, somebody was commenting on how healthy my hair is and I have the hair of like a 20 year old or something. Well, I believe that that's my divine right to have the hair of a 20 year old. I believe that it's my divine right to see with my eyes, without the aid of glasses. So I think that some of that, like that absolute knowing, which is the opposite of Atheist energy and it's the opposite of group mind, it's the absolute knowing that you deserve to see, you deserve to have healthy eyes, this is very much part of eyes regenerating and going back to a much younger state.

Alright my dears, we are coming to the close of our bonus class. I just want you to know how much I love and appreciate you and care about you and how important you are to me. If you're in to the regeneration, the classes we have coming up, we have a class on bladder, we have Your Year of Miracles which is amazing. We regenerate the whole body in Your Year of Miracles. We have a special coming up too in just a couple weeks, Sexier Me: Healing the Orgasm for Women. We'd be regenerating actually all the inner working for ladies. So if that's something that would be helpful for you... By the way, we have Designing Your DNA which is going to be a pretty awesome class and also Happy Chemistry, we're going to be working on restoring your chemicals in your body. Those are both coming up in March, so a lot of really fantastic regeneration classes.

Okay you guys, I love you. Let me know how your vision is improving. You can send to support@julierenne.com like at any point you see, gosh, I'm 9 years back in my glasses or I got to let go of my glasses. Let me know. Let me know how things are going. I want to hear from you. Love you! Bye-bye! By the way, there are videos to watch, if you want to see some of the upcoming classes. I'll talk to you real soon. Bye everyone!
