

Earth Day Global Activation

Good morning, good afternoon, good evening and welcome to our quantum activations call on Earth day and this is a very, very special call. We are gonna be clearing curses from Mother Earth. We're gonna do the very best we can in the hour. We didn't quite get the numbers we wanted, so we might do another part 2 of this so that we can really get to the complete healing of the Earth. And this is so extraordinarily different from anybody else and that we are literally going to be removing the curses and darkness from Mother's Earth.

So, I honor you and thank you so much for hearing the call and for stepping up. It means so much to me. This is our mother. This is who we live on and who we get all of our nourishment and have the opportunity to be embodied. She provides the place for us. Our playground, our garden of Eden. We've really left some darkness in her, some deeper curses and that's what we're gonna remove today, so. Welcome everyone to the call.

We have almost 15 hundred people signed up for this call. So I probably am gonna see names coming in and I love you and I can see all my students coming in. I see your names from yesterday and this week and just know that I love you. I'm probably not gonna greet each person on this call just because of the sheer volume of numbers. But thank you, and thank you for signing in because I actually do look at the chat box. I print it out and read your comments after the call. So, please do sign in. Let me know where you're calling in from. Where you're dialing in from. I'd love to see all the different places on the Earth that we've touched.

And we're-- since we didn't make our 2 thousand number, I wanna get it started just instantly. So we're gonna be doing clearings to clear curses and dark energy from mother Earth using the quantum field. We'll start with the blessing and we're gonna right into the pumping. For those of you who are my students and already know how to pump, you can get started right now with your hand pumping and in a minute, I'll teach everyone who hasn't done it before. So we'll go through that.

But first we'll do an opening blessing to clear the obstacles from our path to day. From this ceremony. From this very sacred connection of healing mother Earth and then really we'll also be calling in the divine beings who guide us. For Christians, Jesus and Mary. In this chant, it's the different Vishnu and Brahma and Shiva and Ganesha. But we really are asking for the blessings of all the divine beings who help with planet Earth.

All those who are here to support the legions of gold beings that are here to make a shift. To help raise the dimensional frequency on planet Earth. We ask for help. We're asking with our hearts open with the Supreme Being. With all of the guiding spirits: the

angels, the hierarchies of heaven and of the hierarchies of Earth. We ask our help from everyone to help us accomplish our goal in uplifting the Earth and really removing the damage that humanity has done to the Earth. [Sings in Sanskrit from 00:03:38 to 00:04:43].

Alright. And we're gonna do a quick review for everyone. The quantum pump and we won't cover muscle testing this time. We're just gonna be pumping to clear and I wanna just make sure that everybody knows what we're doing, so.

The reason the quantum pump works is that we're using our mind to create a thought. A thought of shifting something and there are two kinds of physics. There's Newtonian physics, the apple dropping from the tree. The kind of what you see is what you get. The quantum physics which is we're all part of a field of particles vibrating. Based on re-arranging how the particles vibrate, we get a better result and that's what the quantum pump does.

The quantum pump is a hand movement. Your elbow is down at your side and your hand is pumping. This way. This way. And this way, and this is the only pump we're gonna do today. So we're just gonna do the basic pump and for those of you who like to do pump. You can do it both hands. I typically use the right hand but the left hand is fine too. And so my Indian students from India, they pump with their feet which is basically just moving your foot forward and back but on the ankle. Just you know playfully. They were pumping with their feet up. Their legs extended and their hands. So they were doing a quadruple pump. Alrighty. Alright. So that's the quantum pump as we're gonna be doing to remove curses from the Earth. I'm gonna go through now the next thing is getting us into what we're--.

Yeah .And we're back and I apologize for that. There's a lot of energy on this call. We probably need to be also clearing spirits that would be attached to the idea that the Earth would be much lighter and so they might be resisting a little. But we're going to continue on and with our pumping regardless of whether technology comes on and off or not. The phone lines will be open, so. Please do refer to the phone lines if you want to not lose the connection. I can't guarantee that it won't drop off again but we've got the production staff on. We can get everything running back really quickly as soon as possible, so. And I do know I'm up back online here.

Okay. I hope that you can see. I've shut off my camera. I've shut off my video and my audio and I've returned them on. Sometimes that will do the trick for people. Let's see. Very good. And so what we're doing is we're clearing a result for mother Earth. It doesn't matter if you see me or not see me. Just keep pumping. We are clearing for mother Earth and you may not have heard me with my explanation but what is

happening is sometimes there are forces; aliens and what have you, demonic forces, that don't want a change. And so they can be a little disruptive or mischievous.

I know just before the call, some big loud alarm came out of my little tiny computer for no apparent reason. Just kind of like-- I don't know. It's like the siren for an air raid. That would be an alien or a spiritual interference saying, "Oh no. We're gonna try and disrupt what you're doing. But the thing is folks, it's not about you see me all the way through the call, it's about us intending a clearing for mother Earth and no matter what during the clearing.

And what I get right now is that we've cleared about 3 percent. So we've got-- we're off to a good start and I just love for you to you know really stay focused on your pumping and that's what the focus will be. If you can't hear anything, please do dial in to the phone line.

Okay so everybody is just pumping. Pump, pump, pump. Yay. Yay. And sometimes what we do-- how many of you, I wonder, are new to the call. Let's see. 20% of you are new to this. So this is kind of a new thing for you. I got this-- hang one sec. My producer is sending me a text. Okay.

So I got this information like 8 years ago. My story is kind of profound in that I survived the atomic bomb testing. Underground bomb testing which of course is something that we wanna go in and repair for mother Earth also. I think we'll probably make a series of this; of helping her. Because we can do so much on an energetic level. But 8 years ago, I was very profoundly ill and I really, really was deciding is it good to keep staying on planet Earth which so much pain and so many things going on.

And I went into my garden in prayer and meditation saying, "God, take me or make me well. You promised me the garden of Eden. I'm living in hell of Earth." And at that point, I had 17 surgeries. Multiple cancers. I died twice. I was hit by a car and left in a wheelchair with a really serious brain injury and I just was just kind of like, "Oh my god. I know that I can have the garden of Eden. I know it's here but I can't stay in this body if I can't step up and get into the garden of Eden."

And that's when things started really changing. It was that kind righteous call to god saying, "I know you promised me this. So give it to me in body or out of body, I don't care but I don't wanna live in this kind of suffering and pain any longer." And-- but that really not strong-- have you ever had that where it's like, "God, you gotta fix this for me. I need your help. I need you to help me." And things started changing. The hand movement, my hands started moving. I could see my cells regenerating really without my hand movement. The cells were regenerating, I felt like I was watching the cells in my body, the master cells which are stem cells that have been with you since you're 7

days after conception. Those cells were going to their god state and then they were regenerating. They were creating new cells. A cascade of new cell growth.

So, what I continued to discover then doctor's were watching me going, "What in the world is going on with you?" They asked me to teach them whatever I could about how the quantum field was working and so that's when I began to really define things. It started out by me writing you know like a training for a weekend and doctors and scientist would come and have my living room full of people who were interested in learning what in the world is going on. And then that became the basic foundational material for your divine human blueprint. It's now in its second edition with indexing.

And then other books came from there. But this process of clearing and the process of regenerating all starts with the thought in your head and the hand movement accessing the quantum pleasure field. Now, when we chant and we sing, we raise our energy. So our energy gets higher, our vibratory frequency gets higher and it moves things along faster.

So, I'm just gonna look. I don't know if all of those are concerns. Let's see. So, if it's all concerns about technology, I probably not gonna-- "I have tears in my eyes. I feel so good to be part of this. Thank you." Oh, Anna. Thank you so much. "Bliss and blessings to you.", Debra. A single crow just flew in a full circles on the sky above me in the east which means the darkness is done." Beautiful. That's Margaret. Anna, "I asked my ancestors to join us and felt energy moving stronger." Interesting. Yes. That's a beautiful sign. "So much. Thanks for doing what you're doing, Julie." Blessings." from Sue in Massachusetts.

"Earth angel Sophia here to so happy to know you are part of this change for mother and mother Earth's. Specially the children who are very dear in her heart." Yes. Great idea, Anna. And, "Yes, Julie. Thank you for being our teacher." "Can I do the foot pump when my hand tires out?" Definitely. You can definitely do the foot pump. "Love to feel connected all around our planet." And that was Swanika. Swanika. Beautiful. Thank you, guys.

Yeah. I think when I saw we didn't reach, we had-- what I had tested for was that we need 2 thousand people on our live call and we didn't meet your goals. We had 15 hundred people sign up for the call which means probably about half will go into replay and do it later in the day which is fine. And hi to all you replay people. Love you and appreciate you and thank you for pumping.

So it got me thinking that we need to ask all of the spirit guides, all of the divine beings and the masters and all the beings of light and the angels to also help. Now, we, with body, are gonna be most effective because we, with bodies, humans, are the ones who actually you know, as a race, we created this problem for mother Earth, so. So we're the

ones. We're the ones that are gonna be most effective but being supported by our ancestors.

Being supported and by the way, you'll see my hand doing different things. You just keep do your pump. So sometimes it does kind of whirly gig thing and it's just speeding up the energy so we're more effective, so. There's my whirly gig. That's my mentoring whirly gig. You just keep your steady pump and pumping like this. Double pumping may increase our effectiveness, too.

Someone texted me who has my cell phone but I don't know who it is. Said, "The painted turtle was crossing the driveway here at the beginning of the call." That's interesting. Yeah. The animals will celebrate with us as we are clearing. Like I said, I think all of you saw the invitation, the enrollment page, and I took my 8 immersion students to the beach and there were 9 of us and we cleared for couple of hours in 80 mile radius. And literally, a couple dozen dolphins showed up really just you know swimming in the first wave. The wave closest to the beach.

So they came in as close as they come to be with us while we were clearing the Earth. So it is a day of celebration when we can make a change like this. And I get that we've removed 5 percent of the curses of the Earth and the darkness from the Earth. So that's really, really fantastic. I see lots more comments coming in.

Swanika says, "Love to feel connect." Oh yes. I read that one. And Ashley, "I have Gundarva experience from Kenyan playing to full support." Good. Feel physical healing thank you. Wonderful and that's Lucy. Cynthia, "Some candles asking for angelic help just before we started. May they be on board." And I do feel that the angels and the golden legions and all of those support beings that support humanity are here standing with us and helping as they can.

And understand that we are powerful and we live in this physical dimension, in the 4th and 5th dimension here. And so this is our realm to clean up and to have them stand and hold the space with us and whatever they can do to affect change, we're the ones who need to initiate this. It's our responsibility and it's so wonderful to have them standing by our side and really as mentors and guides and love beings holding that energetic space for us.

Oh. Lots of text are coming in. Let's see here. Okay. So that was that text from the turtle is from Carrie in Ohio.

Let's see. "If we don't perfect play pump, does the Earth benefit?" Yes. You're so cute. Oh my goodness. Hey, we're just-- we're not looking for perfection, we're looking for you to help and the heart in the right place, the mind in the right place will make a big, big, big difference. So don't worry. Pump goes like this. It's just your hand extending in and

out. Like that. And it's not this. It's not the squeezey, it's just this. It's just kind of-- let me back up a little bit. There we go.

And let me show you-- so if your hand is not a really cooperative maybe you have a problem with your wrist or something. I'm gonna show you. You can stand or sit and you can do it on the side. You can do it-- [Inaudible 00:22:26]. There we go. So when I'm walking or I'm at a restaurant. We can just kind of it's like a flutter more. There you go. You can see it there. There we go. It's kind of a flutter. You can also do that when you're sitting. If it's hard for you to do this, do this. And then see how it's at my-- when I'm doing the pump, it's at my waist. See how it goes? And then the double pump looks like this. Okay.

Okay. Oh. There's the Earth. That globe behind us there. Okay. Let's see some comments have coming in. Renda, "If we do the quadpar would that give us at least another 500 to thousand more help." I don't know. It does a little bit more. A little percentage more and it's playful which keeps people spirits up. So that you know sometimes pumping. If you're pumping for hours, might feel boring. So keeps people kind of in a happy mood.

Yeah. Somebody ask-- sorry. It's already off the screen but somebody ask what are we clearing for. Let me show you again so you understand. I did have it up but I-- you know we were having technical difficulties at that time. We're removing the dark energies from the planet. We're removing evil spirit curses, satanic curses, the human emotional field which is the negative human emotional field; not everything. So let's just put negative in there so that it-- negative human emotional field related to mother Earth.

And then spiritual interferences. I saw that with our harm, aliens type 3, 6, and 8 kind of had ganged up in there. So they rode on the damage that humans had done and so we also included them in clearing them out so that we remove. They weren't anchors but they were wrecking having on like lower beings or beings that were maybe a little blind to what they were doing.

If you can think about people who well we're making beautiful wood furniture and then they're tearing down the rain forest to make this gorgeous wood furniture for people and they have all the craftsman and all the you know like they're just blind to the idea that they're doing harm because they're thinking they're doing something wonderful or doing something for us, so. And then the aliens, these inter-- spiritual interferences like aliens. You know they live as kind of a voice in the head is what they live in is maybe making that just so that they don't have a moral compass or conscience.

Brenda says, "She tells people she's doing hand exercises." Exactly, you are. But you know what, this is really catching on and I heard somebody in London say they saw

somebody else pumping at the same time they were pumping and realized they look at smile at each other and waved and like, "Hey. I know what you're doing."

"Thank you so much, Julie. So grateful here. As a Pacific Islander, I feel deeply much of the harmful impact of man-made activity. The rising water temperature and the tides have also affected us as well and have called in much more spiritual guides and ancestors to join in. Thank you." Yeah. Thank you. That's Lydia. And you're welcome, Audrey. "Mother Earth is such a magnificent being. Tears ran down my face as you chanted and we brought in the divine beings. Beautiful." And Donald, "So full of joy." Beautiful. Beautiful. Beautiful. Beautiful. Alright, my dears. Let's see.

Iada is saying, "Good morning. I keep yawning." That's normal. That's clearing energy. When the negative energy go that we are-- where does the negative energy-- It actually-- If you think about in terms of being transformed into pure energy as suppose to negative energy. So we're re-arranging the particles, so. So we're really transforming the situation rather than or it's not going somewhere. It's changing to something else. Now I think that's the best explanation. That is changing. It's going back to. Because you think, "Well, where did it come from to begin with?" I mean there was energy that existed and then what replaced the energy there was-- at one point, there was a healthy, pure Earth, right? And then there-- you know, it's like where does anything come from because it all comes from the field.

So directed thoughts became darkness and curses and those curses went into the Earth but those thoughts came from humans usually. I mean that's what we're clearing. We're clearing the damage of humanity, And so those thoughts can transform in the field back to higher frequency vibratory-- higher frequency vibratory experience, so. We're really transforming how the particles are vibrating in mother Earth. So we're removing the low vibration to a higher vibration.

"Yes." Saila Mae, "That indicates an energy shift, Yawning." Okay. "Can you expand on alien types please?" Probably not on this call. We do do a lot of training on it. But I've defined 8 types of aliens and then there's also the trans-mortals which are alien entities which aren't aliens so we've defined about 10 of them. And we have a training that's coming up really soon in July. We have a 7 hour and then another advanced 4 hour after that. In addition, we do a technology tune up which is all about removing aliens from the technology, so. Those are places where we really would go into more detail about aliens.

And what the book says today is really on keeping the love energy moving towards mother Earth and really working towards this deep profound clearing for the mother. We are so grateful for the mother who gives us the incredible opportunity to live and be and enjoy and experience. I wonder if you guys can hang on one sec. You might be able to

see out my window. I'd love for you to see. I live on the top of a mountain. Let's see if you can see. Can you see out there? Not really. No. No. Okay. Thought I would try. It's a little bright.

I have 3 acres in Monterey County in Carmel. And Carmel Valley and it's so beautiful here. So I overlooked mountain ranges so you can see one mountain and then the next mountain and then the next mountain. My house is fondly referred to as a Miami house by the neighbors because it has palm trees and some of the acreage, about 2 and a half acres is actually clear. So it doesn't have the live oak in the front yard and the back. Entry area which is the back of the house. There's a lot of live oak. Beautiful healthy live oak and by cottage there's live oak. But this whole big area has been cleared. So it looks a little bit like maybe a full red house. Anyway, it's just gorgeous here. I love it.

When I moved it, I was so surprised that there was much darkness in the land 'cause it's such a beautiful place and yet the land was deeply cursed and having lived in a same location for 14 years, I had, you know, cleared every-- all the energy in the house and below the house and surrounding me but that was beginning to be really problematic. I was living really close to a freeway in a little condo. And so there were 36 families really close to each other 'cause condos are like 4 units right next to each other, 3 stories. It was getting harder and harder to keep the space cleared and I thought move out to the country is my dream come true.

And when I moved it, I realized that there was more to be done. It wasn't that-- I had left something here. It was that humanity over time has really darkened the planet and so one of things that I had really thought in addition to some of the alterations we're now doing while we're improving the human blueprint, we're retrieving parts of spirit and parts of high self. We're restoring soul and life force. I felt that it was equally important to be doing this for our mother, Mother Earth, who has provided such a beautiful place. A beautiful garden of Eden for us to live on and that the garden of Eden would become more hospitable and more joyous and more joyous place to live.

Romania, "We have lots of problems." yes. Because of the curses. I do understand that, Adriana. And you're welcome. Really happy that you're on the call. We'll see how far we get today. We might do one more follow up call so that we get the entire Earth. But we are making progress and I'm so grateful for each one of you, so. It's very important. The work we do is very, very sacred here and I know I put you into the choir when I say you know it's just-- you just can't understand really the debt of the importance of things if the human race is going to elevate to the next dimension which is from 4 to 5.

We must also elevate and clean up our messes. Not that you guys made the mess but we as a human race made the mess. And so we have to be responsible in that way and bring and restore the Earth to her natural state of existence, of purity and truth.

John from Jamaica. "Can we do this on a regular basis? Is there a good time perhaps during season changes?" Yeah. That would be great to do it on a regular basis. To keep clearing the Earth until it's totally clear. How I'm doing that is I'm testing to see where we're getting. So we're clearing and then I'm testing how much. We've cleared 7 percent. So at 9:34, 34 minutes into the session, we've cleared 7 percent of the Earth which is phenomenal. You think about, "But we still have 93 percent of the Earth to clear." So, yeah.

And I see there's 393 viewers on my screen and there's probably-- Oh. 430. Okay. 430 and then we've probably got another 50. If my support team is listening in, could you text me how many people we have on the phone line and then we can just kind of check in on how we're doing with the numbers of people pumping. That would be great, too. So, 450 on the live call. Very wonderful. But like I said, I had tested that we needed 2 thousand on the live call for 2 hours to do the entire Earth, the entire planet and it's gonna be mostly us. Our divine guides and angels are gonna be holding the space supporting us but it'll be mostly us. Let's see what we've got here. 71. Okay. Good. So we have over 500 people. That's fantastic. So we have 5 hundred-- 511. 511 people. Yay.

So thank you, thank you, thank you for being on the live call and helping. So maybe we make a game plan. Let's see. I get that doing this on Sunday like the 7th day, the-- in mythology, in Christian mythology, and then Jewish mythology, the 7th day he rested. The resting day is probably a good day to do a clearing on the Earth. The Mormons I know they do fasting during the day on Sundays. So this could be like a tradition of Earth clearing on Sundays. So that might be good.

I just muscle tested that Sunday is the best day and then let's see. Let's look at equinox is no. Not equinox. Solstice? The summer and winter solstice; yes. Summer/winter solstice, yes; not the equinox. And how many types-- It's Monday and the equinox. That's what I get.

And if our group met 3 more times, we could get to zero which is what we're looking for. We're getting-- we're looking for clearing to zero. That's what I was hoping we might do today. So looks like if 511 people met 3 more times, we could get to zero. So let's see.

"Will this Earth-- Will the clearings Earth prevent earthquakes and tsunamis?" I get a no but would earthquakes and tsunamis be less likely to happen with this clearing and I get a yes. Less likely to happen. So there are things that in motion we may not be able to undo but there are also when we start just-- what we're first doing and what we do with the body when we clear the body to regenerate, we first have to just clear the field and then there's things that we can do in addition to that to heal the shifting plates which allow for the earthquakes and the tsunamis. So there are additional things that can be

done but before we can do any of that, we have to just clear the decks with the curses and the dark energy. So that's step one, and then there can be additional steps.

And understand that the way that the Earth is having the tsunamis and the earthquakes, I'm sure you've figured this out is she's trying to rid herself of some of the number of people that are on the planet because there's-- for every certain number of peoples, there's others harm being done and so you know that's one of her methods is to quake and shake and flood these terrible, terrible things that are happening literally to you know get rid of some of the difficult humans. And not that all the who had tsunamis or earthquakes are difficult humans 'cause they certainly aren't.

Good. Good. Good. Okay. Yeah. We'll organize something. Let me kind of sort that out. We have a pretty active schedule but let me find sometimes that we can do some additional clearings and also for all of you who are watching the replay because we have about a thousand people who didn't make the live call and let's see. Let's see. In 24 hours when everybody's done an hour of clearing. How many-- how much more is left because we might actually you know do pretty well if everybody does pumping for an hour or two hours or 3 hours.

Today is one hour, Brenda. We always do our quantum activation free calls are an hour and we typically do them about once a month but we do them for a special reason. "What special changes will we see after the clearing?" It's more of what you'll feel. The Earth will feel friendly and better. Someone had, I had mentioned about the clearing I did with my students in this area, the 80-mile radius. And somebody said-- actually it was a summit person, Shiela Galeson, yeah. We could all really feel better. I mean everybody felt a shift in Monterey and Carmel and Pebble beach and it just felt totally different. So the frequency of the Earth will feel different. It'll feel friendly, easier. You'll feel more relaxed.

It won't have that sharp edge that a lot of places do or a darkness that a lot of places do, so. And most importantly is we're righting a wrong. You know, we are the inhabitants and the caretakers, the keepers to honor and cherish the land and we've quite done the opposite. So I think you'll also feel it in yourself that there's a righting, there's a correcting happening. There's an aligning. You're aligning with the Earth. You're aligning with the goodness of the Earth.

Okay. And I get lots of messages about happy to keep clearing. So I will tomorrow and next day check in and see what's left. I'll set up at least one more additional time if not 3 more times. We'll just see what's left and we'll continue to clear until we get to zero. Thank you so much. It was a little bit-- my team was like, "oh. We have you know 14 hundred and some-some number. " And I was a little bit, "Oh darn. We didn't make our numbers." And I was a little sad like, "Don't people care?" I mean we put this out to 400

thousand people. Not you. You guys care. I bet that you guys care. When we put this out to 400 thousand people and we had just under 15 hundred people signed up and I was a little sad that 400 thousand people mostly didn't think that they had a responsibility or had the possibility to really in some way. And understand about work but we have the replays, so. It just made me a little sad when I looked at the numbers and I thought, "Goodness. Goodness gracious."

No. Our staff is lined up for an hour, so. You can keep pumping for the additional half hour but I won't be-- you won't be able to see me for that extra hour. So why don't we do that? Why don't we go -- we'll go till the hour on screen and then we'll continue to pump. Everybody can agree to continue to pump for an additional half hour.

You know the one thing that I've gotten so clear about is that some things need community to do and this is one of them. Where it's my heart's desire to help heal the Earth and it always has been. I've felt very, very strongly for her forever. And I'm not an activist and I'm not like a ecologist or whatever those names are. I have some friends who are activist but there's a deeper level of just she's the mother who provides for me and I want to be a responsible guardian for her and a caretaker for her. And so to me, this is really like one of the most important things we can do ever is just help right the wrongs of that the human race has done, so. We will continue this mission and like I said, the very first step is to clear the curses and to clear the darkness.

And then the next step might be to start going in and healing the rift on the inside of mother Earth and allowing her to calm and settle and when she knows that she's safe like we know when we know we're safe. She may be in agreement that not so many people need to be taken off the planets with catastrophes and I personalize her a little bit but actually, you know, a mechanism will -- an organism rather will get rid of what is deserving them just like if you had a virus, you would go and take an anti-viral or you would pump your way clear or you would do whatever method you had to get rid of a virus and in not human them self but the actions and the effect of the actions humans take, so. It's not the humans that is the problem, it's the actions that we take., so.

You know, she's trying to get rid of the virus that actions and you know understanding that if we are no longer a virus on her that we are a contribution. That we're a loving energy field around her and on her and honoring her, the things really shift, right? And I know things take time but we can make a huge difference.

I remember an old song. I think it was made from the 60's. You probably remember this if you were in that generation. One man's hands can't tear a prison down, Two men's hands can't tear a prison down, But if two and two and fifty make a million, We'll see that day come round, We'll see that day come round.

You think about it's true. If we all work together, we all-- you know this is a prison, isn't it? We put mother Earth on a prison of curses and darkness. Not we in particular. I know that you are the good ones, you are the good guys but you know lifetime after lifetime of many millions of humans, billions of humans. So we can do it. We can tear the prison down and we can really serve. And I actually feel a great deal of joy from mother Earth. She's really I can feel her. I can feel her happiness. Actually feel her weeping, she's so happy.

Oh yeah. That's true. Janice is commenting about a story I told. I was married as a teenager and I moved on to this farm and it'll be in the family for 137 years and it was heritage farm. And we had an old apple tree, the apple tree was over a hundred years and it just gave wormy apples. And every other year, we give a few wormy apples and I just knew, I just knew that that tree can be revived if it were just filled with love and appreciation and that you-- I harvested the apples. So I went out and I took every apple. Here I am a teenager and I'm like taking every apple off the tree and they're all full of worms and I didn't throw them away. I pet the little quarter of the apple that was still good and I met apple sauce and pie apples and apple butter and I thanked mother Earth for providing food for my family.

And the next year, she provided thousands of healthy apples. There were few apples with worms in them but there many, many, many more apples. Like 1 in 10 had a worm in it and there 9 that didn't have any worms in it and again I harvested every apple. Didn't any apple that fell on the ground, I picked it up so there was nothing left. So every year, year after year, she would give this huge volume of apples.

But the interesting thing is the family said, "Oh that old tree was just kind of down. He's just a wormy old tree." And it's you know life is over. And they were really shocked when they saw what was happening with the apple tree. And you know that's kind of magic that we have available to us that something that looks wormy and old and dead can actually be full of life and wisdom and grace and contribute in the biggest way, and really contribute in bigger ways.

And then you think about our-- first of all, just clearing the decks from mother Earth but you think about what she provides for us. All the nourishment and the joy and the pleasure. So we get a lot. We benefit a lot from living in this Earth.

For every person who has a physical body, there's at least a hundred human spirits that don't have a physical body. So understand that you're in a very privileged place to actually have a physical body. Be a person you know in bodied on planet Earth. This looks that everybody wants to be on. That's why we have so many alien visitors and we have good ones, too. So I don't wanna make it that they're all bad. I just identified some of the bugaboos that are harmful ones. We have good friendly neighbors who come in

and help humanity, too, so. But we really have this planet Earth is like it's a paradise and we can restore it to this beautiful, beautiful vibratory frequency where we shift up.

Because humans are shifting up. They're shifting from the 4th to 5th dimension but as a race, we have to do it with mother Earth. We can't do it and leave her back in the 4th dimension or the 3rd dimension. We gotta bring her up with us.

Yeah. Maybe less. Maybe less than 50-50. I just wanted to acknowledge. I know a couple alien races that are wonderful. Maybe 2 or 3 and as I've done research, there's probably 25 races that interact with humans. Most of them aren't helpful, so. I agree with you but there are a few that are very helpful and we love them and there are many who - let's kick them off. Let's invite them to go back home.

"Those who are meant to be here are here. Others will be on the replay and then you will have your core team for clearing Gaia." Beautiful. Thank you. Thank you, Hazel. Thank you for that reassurance that we're getting it all done. I look at the responsibility I've been given and the gift I've been given and I have been doing some extremely deep profound work with the students who have been coming in to recent classes and working on upgrading and up leveling for humanity, the human blueprint. And I just wanna make sure that we are, as we're doing these upgrades for humanity and restoring the blueprint and damages that have been done to it, that we are responsible for, you know, our mother too, so. That's my passion here is to just make sure we keep everything in balance and you know that this is a righteous cause so to speak.

"Everything's getting brighter outside since we've began the clearing." Look at that. yeah. It was sprinkling and the sprinkles have stopped. It's very calm. Very beautiful, serene kind of magical. The clouds are there but it's you know it's the after effect from the rain. Really nice.

"Do I grow fruits and vegetables on my land?" I'm hoping to this year. I just moved 13 months ago here and we were in a drought when I moved in. So I've been making it rain and at some point, I'll teach you guys how to make it rain but we don't wanna have the Earth be flooded. So it's been really wonderful year of rain. A nice bit of rain and I've been just kind of make it rain every week. We had a really good winter of rain, so.

The Earth is much more able to support. See if the water returns too. So you're limited. You can only water your garden like on Saturdays. It's very strange situation here where the drought has been very severe for 7 years. I moved here. I'm not actually realizing impact to that so I've been restoring the water to the Earth. The rain's here in Monterey County as that I can and my idea next year is to plant fruit trees and olive trees on the hill that's been cleared. So it's about 2 and a half acres that we terrace and put oak trees, fruit trees in.

And I am really speculating on a vegetable garden maybe next week. My birthday party's this week, so it's been working very fast and furious on the apprentice program and getting ready for the party. But I was thinking next week to put in a small vegetable garden, so. The answer is the plan is yes. The plan is yes and I love roses.

And we have a lot of things that are already here. "Sorry. I'm having trouble." She wants to help us. That's Siri. It's funny. "How can I help you this morning?" She loves to help. "Sorry, Julie. I didn't get that." She wants to help. Isn't that hysterical. When we're amping up the energy and I have to leave the phone here because I get texts occasionally from the production staff. She'll just come on and start talking and say she wants to help. It's so funny. Good. Good. Good.

Boa asking, "You ask mother Earth what she's thinking and feeling at the moment." Actually just a few minutes ago, I almost started crying 'cause she's happy and I could feel that, so. Here we are. We have 5 minutes left. Let's see where we're at with the clearing of darkness and the curses. Oh my gosh. We've cleared 30 percent of the Earth. Wow. 29. 29 and a half percent. Amazing. Amazing. I'm thrilled. Well that is really, really, really amazing.

I get relief and grateful and good, happy, rejoicing. When you're asking about the mother Earth, those are things that I get from her. Yeah. Not anything sad. Really so grateful and I think if we can actually keep going and clear to a hundred percent, I think we have an ecstatic Earth. I think we have an Earth that is totally blissed out.

So I am gonna see all of your comments. I didn't obviously get to answer. Those are moments where I could answer questions and comments but there-- my support team's gonna send all of your comments to me and I'm gonna look at everything, so. If you've made a suggestion or you've asked a question, we'll respond when we decide on when to meet again to do the next clearing, so. I'm gonna go. I'm gonna read through everything, so. Just understand that this is you know process of lots and lots of comments coming really quickly and I can't always respond to everything when there's so many people on the call but I will see everything and then we'll get back to you.

I probably said at an announcement on Monday after the weekends since my birthday party's tomorrow and then my birthday actually-- the technical birthday is Sunday. So we'll sort things out on Monday or Tuesday and we'll send an announcement and if there's some comments that I need to respond to, I'll do it in the group email, so. And we can sort that out. Thank you so much. It was so cool but it's Earth day, party and then birthday. It's like I get to celebrate my birthday for days. I'm really happy.

Okay. And I'm hearing everybody wants to go to a hundred percent and I do too. So for now, we're gonna complete the call in 2 minutes because that's what we've got the production staff arranged for us. So we're gonna complete the call. Everyone's gonna

keep pumping for half an hour who can and I get that you know pretty close hundred a percent of you wanna keep pumping for at least half an hour. We'll have-- and you can pump for more than half an hour but as a team and I'll be pumping too for half an hour. As a team, we'll continue pumping.

And then on Monday morning, when everybody's done their replay and everybody's pumped as much as they can, I'll test to see how much we gotten done and what's left and then I'll arrange another call for all of us and it'll likely be the same time. It'll be on a Friday morning 'cause we generally only once a month do we have classes on Friday morning. So this would be a time where we could pop in another call and we can just set up one more and maybe we'll need more than one call. But everybody is pumping for another half an hour and we have the replay people, we might just need one more call.

And then we can talk about what's next about how to do maybe some Earth healings where we deal with the earthquakes and the tsunamis and the drought and the global warming situation. So, but first thing is to get all of these clearings of darkness and curses off the Earth. 33 percent. 33 percent. We're at 33 percent right now.

So think about that we did 33 percent in an hour for this group. 511 people. Maybe 515 people. There's probably few people extra on here. But you really need may 2, so let's see. 3. That'll be another 2 hours of clearing. Yay.

Okay. Well, thank you so much for your birthday wishes. I love you. God bless you. I've asked my production staff to put on some videos of up coming classes. If you're new to our list and you haven't [Inaudible 00:59:51] those two what we do and what we are. Let me just show you. These are the spring and summer classes we have coming up and we have a lot. So we're in class 2, 3, 4 times a week and that's basically how the work is getting out in the world. I do do a little bit of one to one and I have a yearlong immersion program as well as the online apprentice program is being announced next week, so. These are all the things that are possible.

You can like to stay on, the videos will be running for about 10 minutes but please pump for another half an hour. Let's get as we'll be much closer to 50 percent if we all pump for another half hour. Okay, my loves. I love you so much. Thank you so much. God bless you. Have a beautiful day and we'll see you soon.
