YOU! Your Spirit also has ownership and control!

## WHY DO THEY HAVE CONTROL?

### Guides

These beings are often human spirits without bodies and have control because we asked them for help, or never asked them to leave when they inserted themselves into our body, field, and sometimes essence

Often occupy the mind and have a great input in what a person thinks, says, how they respond

They can be responsible for sudden emotions flooding the body

8% of guides are useful and helpful and can be moved outside your field, you can interact without them in your space

Removing control and removing them from your body and space  
Inform them the agreement of body occupation, ownership, field occupation etc. is over. They will believe they are part of you and have a right to be there so this is a process of continuing to affirm 'I am a sovereign spirit in a body. No one and no thing has permission to be in or around me' quantum pump

## WHY DO THEY HAVE CONTROL SLIDE TWO

Guest

these beings have inserted themselves into your space much like a family member might. They definitely knew you in a past life and you likely notice their presence but don't stop them or force them to move on

Responsible for chatter in your head

Typically occupy heart brain occasionally stomach

0% helpful or good they should be moved out a.s.a.p.

Become aware~ this is not me, I did not think that thought, than quantum pump, first time round affirm you are

## WHY DO THEY HAVE CONTROL

### SLIDE 3

Channeling there at some point is a decision on your part to share the body, whether for entertainment of knowledge, the thrill or even experimentation

They can be from races other than earth, but they are essentially human in nature, for you to channel them

There are famous channels like Esther Hick, who bring in a group of beings, Abraham at any given time 6 to 8 human like spirits who use this mode for expanding their ideas, observing humans and helping

They could have been born and taken bodies, rose up through the ranks as leaders, but opted to make agreements with someone in body, feeling they would have more impact, waste less time ~ and there is something sensational about spirits 'doing magic' chatting revealing truths that is entertaining to the human population

The difficulties of channel ~ spirits are not the vibration the body is set to so over time the channeled spirit can fry out the body. 40% of channeling has some positive effect, however I personally do not recommend it

## WHY DO THEY HAVE CONTROL

### SLIDE 4

#### Ghosts

After passing the disembodied spirit has a choice to move on or to stay. Often when a spirit stays as a ghost, they do not have a choice, meaning they did not cultivate their vibrational signature high enough to move to a healing temple or had no 'faith' a belief in a heaven, nirvana that their spirit would focus on at the time of passing and move to be with those of their belief or grouping.

For example I have seen scientists and artists, gather together in amazing healing temples, also the Christian mythos of heaven, hell and purgatory on some level all exist.

Where you are at the time of death is what you take with you into the after life.

Clearing a ghost requires you to consistently tell them you are not in agreement with them sharing your body and clearing them being consistent is the most important part of getting free of ghosts. No emotion should be brought to this process as it gives them a hold into you. Relax, know that you will ultimately succeed and breathe as you pump them out of your body.

## WHY THEY HAVE CONTROL SLIDE 5

### Walk ins

These are human or alien, have made an agreement with a person who feels they have done what they want with their body and want out. Often the one leaving is disenfranchised and disappointed, and wants to move on to another realm and learn and develop elsewhere.

The possibility of a partial walk-in also exists 3 students in our class are sharing their body with another intentionally (though not necessarily consciously)
