

Aspect of DNA for understanding Areas of the blueprint affected by or in	Description or definition and or issue it may cause	Corrections and other notes
DNA resets Essence Matter Energy Embodiment Amplification	This is the action that happens when you are wakening Just like a computer when shut down will reset itself to the old program, so too will your DNA revert to old programing. With cellular neo genesis 30% of the time the rests may be a factor in slowing or stopping regeneration, in DNA obliteration it could be as high as 40% Sleep is not the only reset trigger, trauma, extreme fatigue in an event may also revert you to the original program your body considers the safe program you came in with	Platter is the best to remove the reset issue at the start. Once you have made the change in body or DNA use the platter for 3 minutes to address that the memory of the original program is no longer a factor. You can also embed a new thought for the issue if it needs something. In this case affirmations can be useful
DNA of others Matter Embodiment Amplification	This happens when you have received and integrated into your body blood tissue or an organ from another. Since you were looking for help to survive for example with blood or organ the DNA introduced from another may end up being the dominating program There may be some reason to also question the possibility of absorbing DNA from a dominant person in your life though we have not explored this, but for example an ex-husband who was particularly abusive	DNA obliteration you will want to address all DNA not just your own if you have this issue. So for example you see on the chart DNA make a mental note I am addressing all details from myself and contributing DNA as I clear
DNA direction soul development Matter Embodiment Amplification	Your Spiritual DNA part of your physical DNA contains the details for the development of your field of embodiment which is your protective chalice for your spirit to live out life in the body There is some faction of humanity that does not have this information in their Spirit DNA, looks like non-human spirits but not including angels who have directions for embodiment soul.	Part of blueprint directions, part of Essence, DNA
DNA Splicing Matter Genesis Amplification	Something spliced into our DNA for good bad or for storage An anchor, humans as well as Aliens have this skill, humans at Stanford are storing family documents in the DNA of individuals saying it has a large storage capacity and a much longer storage	Doorknob clearing

	life with the example the old floppy disc completely useless 20 years later, the DNA stays relevant	
God DNA Perception Essence Matter Genesis Amplification	We have 2 authentic Gods strands which are unique to us we own and author these 22 from mothers side 22 from fathers side which contain genetic heritage and systems development and functions	Strands shortened by alien race in blueprint I have begun repairs, more complex strands are available to us Though I think we need to exercise caution and go slowly with this research and possible integration of more. Looking at how we use what we have well, mastering the basics before we strive to have a big shift we may not have the sophistication or awareness to handle well.
